Profile

Computer Science student with hands-on experience in data analysis, machine learning, and full-stack web development. Proficient in Python libraries: Pandas, Polars, and scikit-learn, with experience building predictive models and extracting insights from real-world datasets. Interested in applying machine learning and data analysis to construct reliable, high-impact software systems

Experience

Junior Software Developer

October 2024 - December 2024

Little Caesars

Folsom, California

- Created an internal application for a lead bookkeeper to automate downloading of reports and saved company 10+ hours of work per week
- Integrated with corporate Little Caesars API to automatically retrieve and process 26 daily sales reports
- Designed and built a Python script to search and download sales reports based on date and export as an excel spreadsheet

Missionary

October 2021 - October 2023

The Church of Jesus Christ of Latter-Day Saints

Fort Lauderdale, Florida

- Directed a district of 10, utilizing the Preach My Gospel (PMG) internal platform to track progress, maintain accurate records for 100+ individuals per area, and ensure data integrity across reports
 - Selected twice to lead technical and linguistic training for new missionaries, focusing on instructional methodology, Haitian Creole fluency, and standardized reporting procedures
 - Conducted daily consultations to identify specific educational and spiritual requirements, translating qualitative needs into actionable daily plans and resource allocation.
-

Academic Projects

Machine Learning Course

January 2026

ML engineer

Rexburg, Idaho

- Analyzed telemarketing campaign data with Pandas and developed a scikit-learn predictive model to identify high-probability customers, increasing call success rates from 11.3% to 44%
- Created a gradient boosted model to predict property values for 20k+ Seattle housing records, leveraging logarithmic transformations to normalize skewed price distributions

Roommate Matcher

April 2025 - July 2025

Project Lead

Rexburg, Idaho

- Architected a relational database schema using Flask-SQLAlchemy to power a roommate-matching platform for Idaho college students; implemented user profiles and preference-based filtering
 - Led a 5-member team by running weekly standups, setting schedules, and delegating tasks to maintain delivery pace
-

Skills

Programming Languages: Python, SQL, C#, Swift, C/C++, Git

Packages: Pandas, Polars, TensorFlow, SciKit-Learn

Soft Skills: Problem Solver, Analytical, Project Management

Web Development: Flask, HTML, CSS, Database Design, Data Integration, Error Handling

Tools: Visual Studio, Github, JetBrains, Arduino/Embedded Systems

Education

Bachelor of Computer Science

April 2027

Brigham Young University - Idaho

Rexburg, ID
